

PLAYECO®

GIOCHI SPORT ARREDO

„Il piacere di vivere nella tua città è abitare in uno spazio sostenibile ed ecologico”

FILOSOFIA

Progettare e realizzare spazi urbani per migliorare la vita all'aperto dei cittadini nel pieno rispetto dell'ambiente.

Questo è il pensiero che guida e motiva ogni azione quotidiana di Playeco.

VISION

Immaginiamo un pianeta in cui creatività, design e innovazione possano rimodellare la società in meglio, con l'obiettivo di preservare un ambiente di vita intatto per le generazioni future. Il nostro forte impegno è dedicato al miglioramento della qualità degli spazi urbani attraverso un team di professionisti con una vasta esperienza nella progettazione e realizzazione di parchi gioco, arredo urbano ed impianti sportivi, creando ambienti innovativi e sostenibili.

MISSION

Progettiamo, personalizziamo e creiamo spazi che arricchiscano l'ambiente e uniscano le persone. Realizziamo soluzioni innovative e sostenibili per le attività ludiche e di tempo libero in aree attrezzate, massimizzando il valore per i clienti e l'azienda.

L'AZIENDA

Da sempre realizziamo Parchi gioco e Aree urbane che sfidano il tempo e rispettano la natura.

Playeco ha sede nel cuore del Casentino, in un piccolo paese della provincia di Arezzo, circondato dal Parco Nazionale delle Foreste Casentinesi e per questo ha scelto di lavorare con aziende che possano condividerne la filosofia basata sui criteri di sostenibilità, valore etico, tecnologia, design ma sempre nel rispetto dell'ambiente.

Grazie all'esperienza maturata dalla famiglia Fantoni nella lavorazione del legno, agli inizi del 1900 e poi nella realizzazione di parchi gioco e arredo urbano siamo arrivati alla consapevolezza di ciò che necessita ai nostri clienti. I prodotti che offriamo sono progettati per le piccole e grandi città che vogliono migliorare le aree pubbliche per tutti i cittadini.

SOSTENIBILITA'

*PER NOI E' UN VALORE IMPORTANTE,
NON UNA STRATEGIA DI MARKETING.*

Per ogni progetto utilizziamo componenti sottoposti a dettagliate verifiche di conformità qualitativa e funzionale. Tutti i prodotti sono realizzati in modo da essere facilmente scomponibili per agevolare il riciclo al 100%.

Quando creiamo un'area ludica pensiamo al gioco e allo sviluppo psicomotorio del bambino ma anche al loro futuro nel pianeta. Utilizziamo il legno perchè è una risorsa rinnovabile:

Il legname utilizzato proviene esclusivamente da piantagioni controllate di legno di Pino con certificazione di origine (FSC), governate ad alto fusto, secondo i principi della selvicoltura naturalistica, mantenendo la biodiversità.

Il legno di Robinia proviene esclusivamente da piantagioni europee e presenta una durabilità naturale, grazie alla presenza di una grande quantità di oli che sono conservanti naturali e proteggono il legno da eventuali attacchi parassitari.

I Pannelli in Polietilene HDPE riciclabili al 100% sono realizzati per il 70% con materiale riciclato.

Pianta un albero

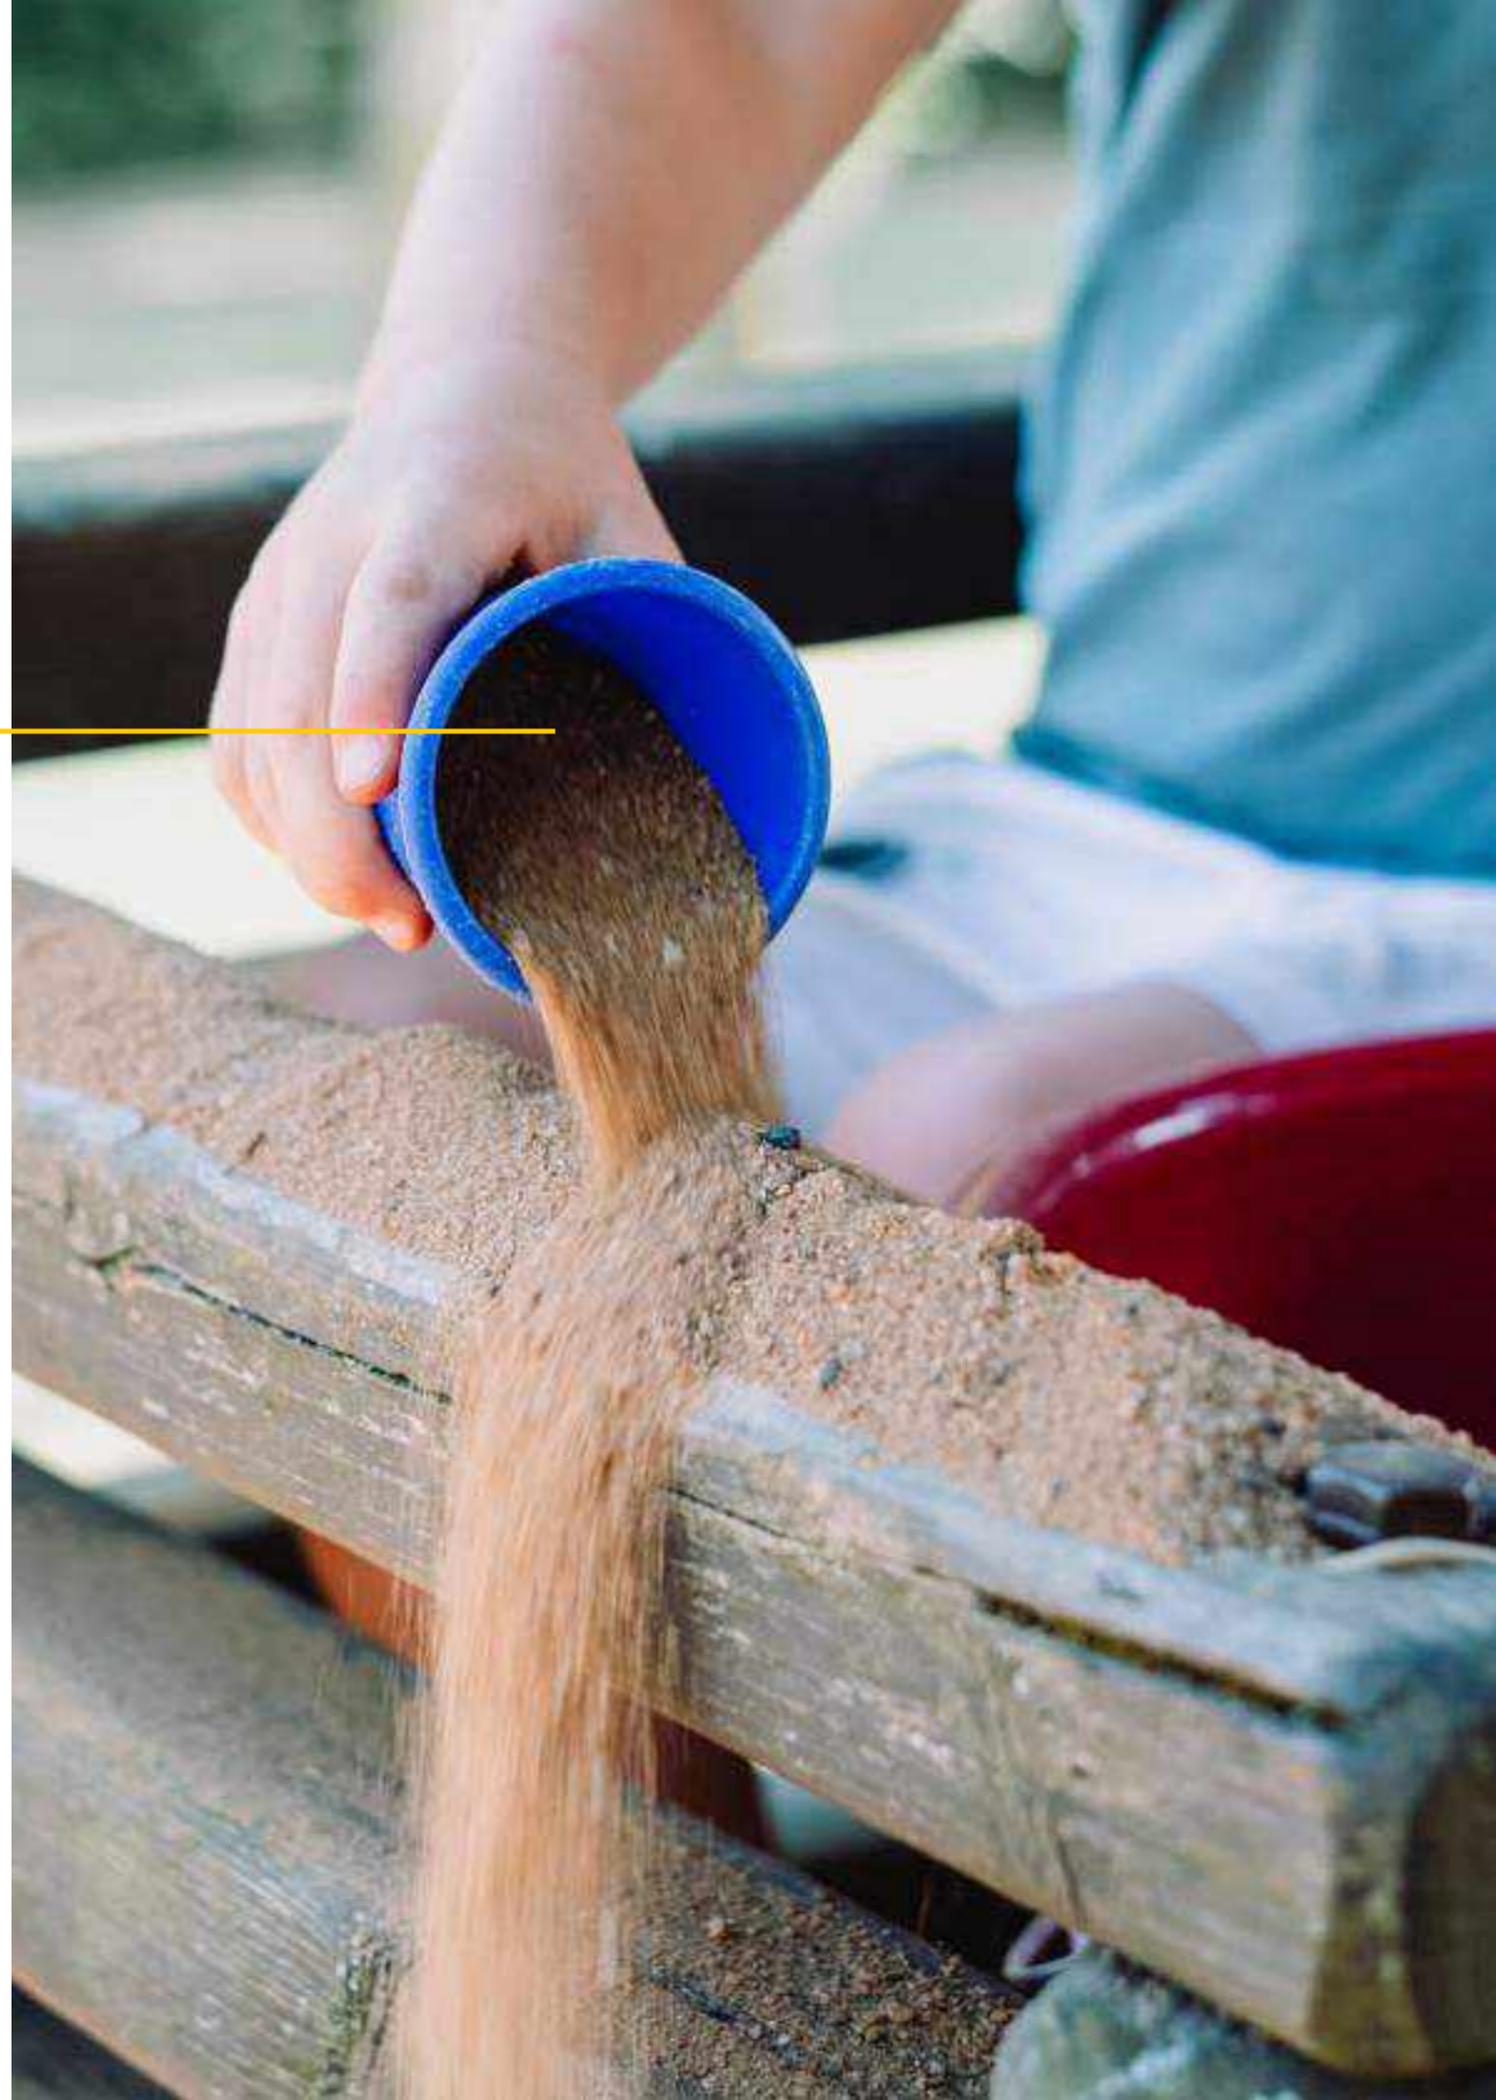

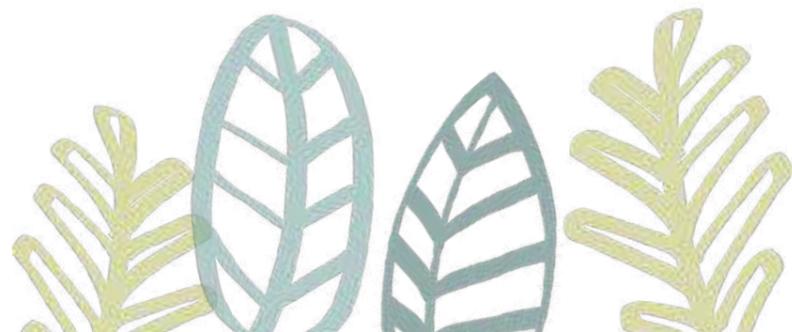

Ogni cliente che realizza un Parco Giochi Playeco, riceverà in omaggio un piccolo alberello, coltivato a partire dal seme nel vivaio delle Foreste Casentinesi da piantare nel parco dove verranno posizionati i Giochi.

Con questo semplice gesto il ciclo della natura non si interrompe, prendersi cura dell'ambiente deve diventare uno stile di vita ed un impegno concreto per la salvaguardia delle prossime generazioni.

GIOCARE IN MODO NATURALE

I bambini e l'ambiente

La maggioranza dei cittadini europei e dei bambini, vive oggi in aree urbane dove c'è pochissimo spazio per la natura. I bambini sono affascinati dalla natura, al punto di trovare interessanti anche i riflessi della luce come ombre, o un luccichio su una foglia bagnata. L'infanzia è infatti, il periodo durante il quale i bambini apprendono ciò che sono capaci di fare. Solo tramite il gioco potranno fare esperienze che li renderanno adulti felici: socializzare, gestire eventi imprevedibili, comprendere il pianeta in cui viviamo. Per questo è indispensabile progettare aree ludiche ben integrate con gli spazi verdi, in cui i bambini possano sviluppare la fiducia in se stessi attraverso l'acquisizione di abilità fisiche e intellettuali ed essere immersi in elementi naturali come il verde, i materiali naturali, l'acqua, la terra, la pioggia, la neve e il vento.

COME CREARE SPAZI GIOCO PER BAMBINI PER TUTTE LE ABILITÀ

La progettazione di spazi per bambini di tutte le abilità.

Progettare aree gioco inclusive significa favorire l'accesso a tutti i ragazzi nelle aree ludiche, dando le stesse opportunità di divertimento e gioco. Quindi nella progettazione dobbiamo tenere in considerazione le esigenze di tutti i bambini, con i loro bisogni, offrire vari livelli di sfida in cui tutti possano essere in grado di trovare attività ludiche interessanti e stimolanti per giocare insieme.

Elementi base per creare un parco inclusivo:

- Deve essere accessibile a tutti, anche a chi usa la sedia a rotelle
- Deve contenere una vasta scelta di luoghi e modi di giocare
- Deve tener conto del fatto che i bambini con disabilità hanno bisogno di spazio per muoversi, non creare conflitti e non sentirsi esclusi
- Scegliere i prodotti per il gioco integrato/ inclusivo
- Evitare i „prodotti per disabili”
- Creare situazioni in cui bambini con diversi gradi di abilità si aiutino tra loro
- Creare aree dove il giocare con la sedia a rotelle diventa parte delle attività
- La pavimentazione deve consentire a tutti di muoversi e può diventare parte di un percorso sensoriale

La sicurezza nel gioco non dipende soltanto dalla conformità delle normative vigenti, quanto piuttosto dalla professionalità nella selezione, nel posizionamento, e nell'orientamento delle attrezzature ludiche e degli elementi di arredo nel contesto dello spazio gioco. Abbiamo selezionato le migliori aziende per poter offrire prodotti competitivi, di qualità e di design.

Con il team di Playeco mettiamo in pratica le vostre idee con creatività, rapidità e flessibilità.

SERVIZIO DI MONITORAGGIO E MANUTENZIONE

I bambini amano giocare all'aria aperta, specialmente nei giardini ben curati e in buono stato.

Playeco propone una serie di contratti di Monitoraggio, manutenzione e riparazione a seconda dell'area e della frequentazione prevista.

La durata e la sicurezza di un'area gioco dipendono in gran parte dai lavori di manutenzione effettuati, Playeco è in grado di offrire questo servizio in conformità alla normativa di sicurezza in vigore UNI EN1176-1 UNI EN1176-7, con controlli da effettuare a intervalli specifici per ogni area.

Contatta il servizio Manutenzione & Riparazione di Playeco
0575 956006

CERTIFICATI

Tutte le attrezzature ludiche presenti in questo catalogo sono conformi alle norme Europee sulla sicurezza UNI EN 1176 e vengono prodotti in stabilimenti certificati ISO 9001 E 14000.

PLAYECO

Le nostre attrezzature sono disponibili in due versioni per ogni vostro progetto:

EXTRA PLUS ZINC (EPZ)

Tetti e pannelli sono realizzati con pannelli in polietilene durevoli resistenti alle condizioni atmosferiche. La manutenzione (pittura) non è richiesta.

Montanti in legno lamellare fresati verticalmente.

I montanti sono fissati su staffe in acciaio zincato.

Le pedane sono in HPL antiscivolo.

Elementi in acciaio sono protetti con zincatura e vernice a polvere.

Versione METAL PLUS (MP)

Tetti e pannelli sono realizzati con pannelli in polietilene durevoli resistenti alle condizioni atmosferiche. La manutenzione (pittura) non è richiesta.

I dispositivi hanno pali di sostegno realizzati con profili in acciaio interrati direttamente nel terreno.

Le pedane sono in HPL antiscivolo.

Elementi in acciaio sono protetti con zincatura e vernice a polvere.

TRIANGULO

I pali portanti principali sono realizzati in legno di pino impregnato a pressione. Sono a doppia scanalatura per evitare fessurazioni. Ogni palo è montato su un ancoraggio in acciaio zincato a caldo per proteggere il legno dalla decomposizione. I pannelli e i tetti sono realizzati con pannelli in HPL, un laminato ad alta pressione estremamente durevole, resistente alle condizioni atmosferiche e ai raggi UV. Tutte le ringhiere e i connettori sono realizzati in acciaio inossidabile. Divertimento e lunga durata garantiti!

- elementi strutturali della collezione - pali quadrati a doppia scanalatura in legno impregnato
- i pannelli di sicurezza e i tetti sono realizzati in pannello HPL - durevole e resistente alle condizioni atmosferiche e ai raggi UV
- raccordi in acciaio inossidabile
- funi in polipropilene con anima in acciaio, resistenti agli agenti atmosferici

TRIANGULO

N
new

1

I pali portanti sono realizzati in legno di pino a sezione quadrata, impregnato a pressione, con scanalatura su ogni lato per evitare spaccature.

2

Tetti e pannelli sono realizzati in HPL estremamente durevoli nel tempo e resistenti alle condizioni climatiche e UV.

3

Scivoli di alta qualità realizzati in poliestere laminato molto resistente agli agenti atmosferici.

4

Raccordi in acciaio inossidabile.

5

Funi in polipropilene resistenti alle intemperie con anima in acciaio.

6

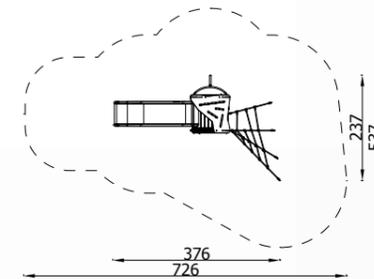

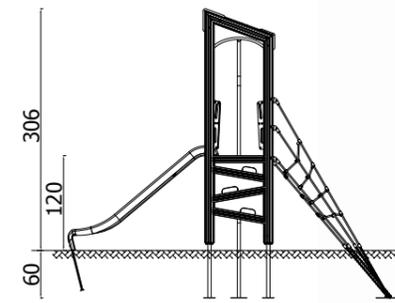

Caratteristiche, estremità dei pali smussate..

Robini

Nuova serie di attrezzature ludiche in legno di Robinia, che garantiscono ai bambini di crescere attraverso il gioco e di tutelare il loro futuro grazie ad un materiale sostenibile e rinnovabile. Montanti in acciaio inossidabile, pannelli e tetti in legno di Robinia, bello da vedere, estremamente resistente, permette di creare giochi dal design pulito ben integrato in un contesto naturale.

- pali rotondi in acciaio inossidabile di alta qualità montati direttamente nel terreno
- tutti gli elementi in legno vengono realizzati con materiali estremamente resistenti, legno di robinia resistente alle intemperie, trattato con vernici impregnanti incolore
- connettori e scivoli in acciaio inossidabile
- funi in polipropilene resistenti alle intemperie con anima in acciaio

1

Tutti gli elementi in legno sono fatti di legno di robinia estremamente durevole, protetto con vernice impregnante ad acqua, trasparente.

2

I pali portanti della Serie Robinio, sono realizzati in tubo di acciaio inox e vengo fissati direttamente nel suolo. Ogni palo è coperto con un tappo in legno di robinia.

3

Funi in polipropilene resistenti alle intemperie con anima in acciaio, dal colore naturale che si adatta a tutta la collezione.

4

Raccordi in acciaio inossidabile

5

Baby Zone

Attrezzature ludiche per i più piccoli

SEDUTE SICURE E MULTIFUNZIONE

- Basse pedane antiscivolo
- piccoli scivoli
- ingressi comodi

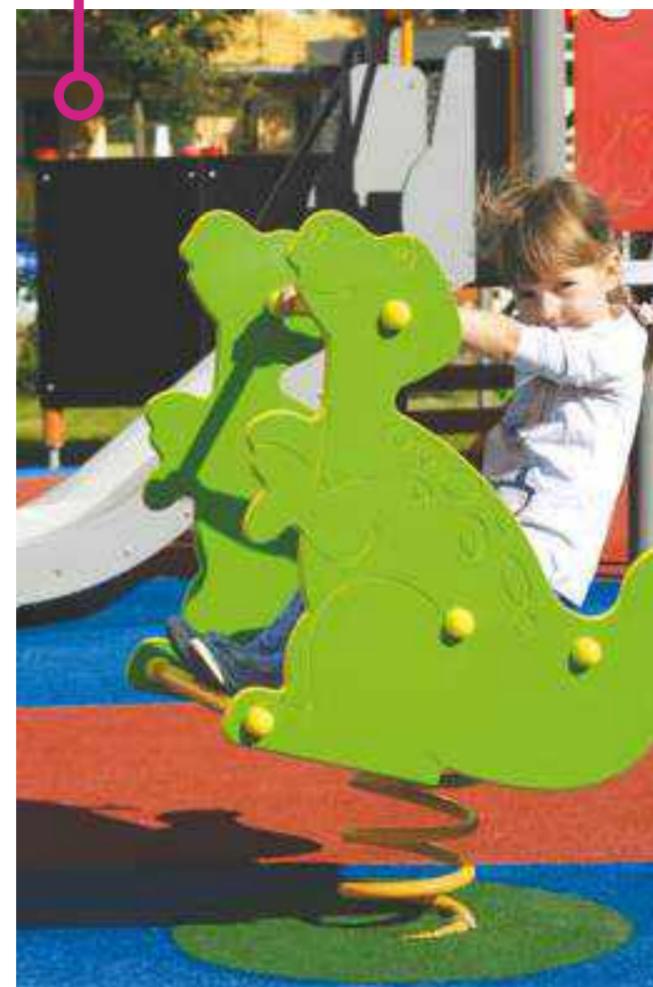

- abachi, orologi
- pannelli di attività
- pareti con Oblò

Serie DINOPARK

- Sabbiere con sedute
- piccoli scivoli
- ingressi comodi
- design interessante

MINI ISOLE

- pannelli di attività
- panchine
- possibilità di combinazione
- giochi a tema

Caratteristiche collezione QUADRO:

- disponibili in legno  o metallo 
- Due possibilità di scelta: Extra Plus Zinc and Metal Plus (descrizione pag.14)
- nella versione Extra Plus Zinc, gli elementi portanti sono pali in legno lamellare, con scanalature verticali montati su staffe in acciaio
- nella versione Metal Plus, i pali di sostegno sono realizzati in acciaio di alta qualità
- tetti realizzati con pannelli in HDPE
- pedane antiscivolo in HPL
- i set, pensati soprattutto per i più piccoli, sono dotati di pannelli di attività

Ferrum

» La serie Ferrum si compone di attrezzature ludiche di metallo. Include una grande spirale, lunga 10 metri, altalene con struttura in acciaio inossidabile, elementi di arrampicata e trampolini. La migliore scelta per ragazzi che amano le sfide e danno valore all'attività fisica.

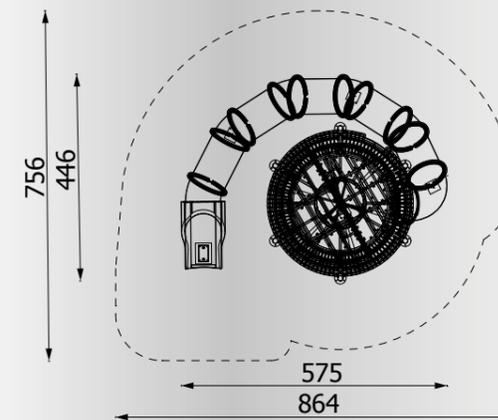

Possibile trovare altri prodotti della linea Ferrum sul nostro sito internet www.playeco.it

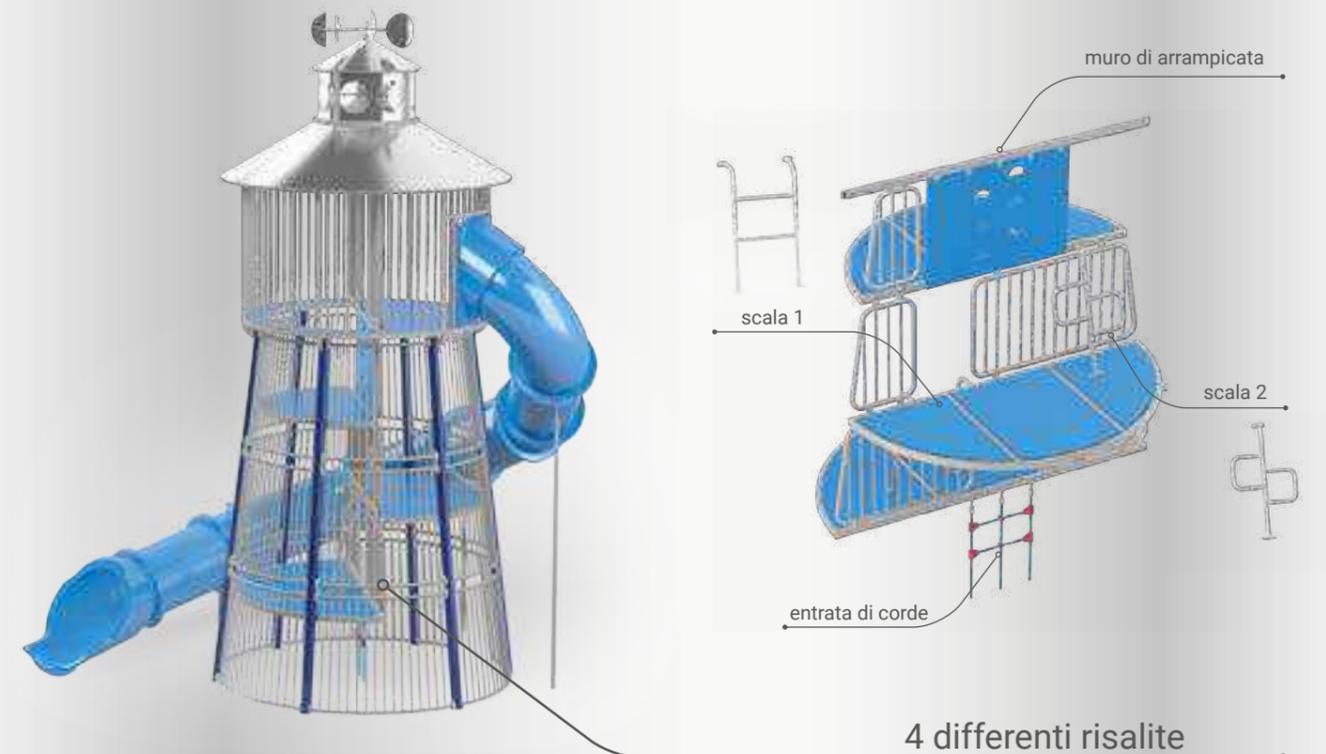

Il gioco ideale per lupi di mare ed esploratori. il Faro, da cui puoi osservare il mondo circostante, per poi tornare a terra grazie al tunnel lungo 10 metri!
Per salire sulla cima della piattaforma prima bisogna scalare l'impegnativa parete, con scale ed entrata in corda.
Il divertimento è garantito!

Caratteristiche della serie Ferrum :

- strutture portanti formate da un solido tubolare di metallo con diametro di 114.3 mm
- pedane anti-scivolo
- corde di 16-18 mm di polipropilene con anima di ferro, resistente alle intemperie
- i connettori e gli allacci delle corde sono resistenti alle intemperie e ai raggi UV

Action4Kids

La serie Action4Kids con i propri set moderni e realizzati con materiali di altissima qualità offrono un divertimento senza tempo e senza ostacoli. Le pareti da arrampicata, gli ingressi ad arco e le scale sono una delizia per gli avventurieri.

I dispositivi Action4Kids sono perfetti per gli spazi delle grandi città così come per le aree più piccole per i bambini. Il loro grande vantaggio è che non richiedono manutenzione e sono altamente resistenti agli atti vandalici.

1 Elementi costruttivi realizzati con tubolari rotondi in acciaio con diametro 114 mm

2 Tutti gli elementi in acciaio sono zincati e protetti da uno strato di verniciatura a polvere.

3 I pannelli sono realizzati in HDPE

4 Pedane con superficie antiscivolo

5 Funi resistenti in polipropilene con anima in acciaio

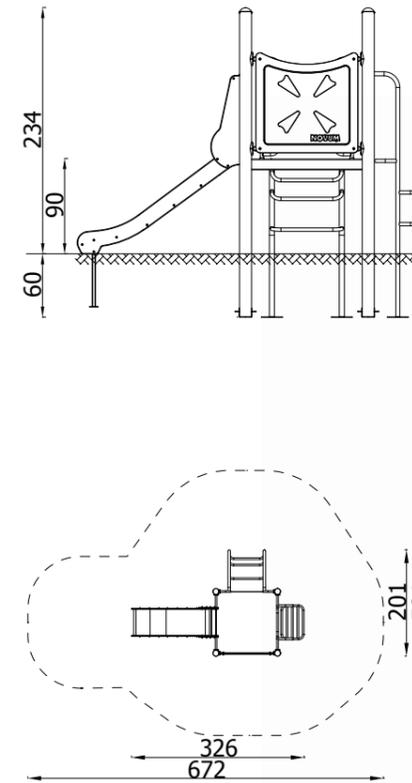

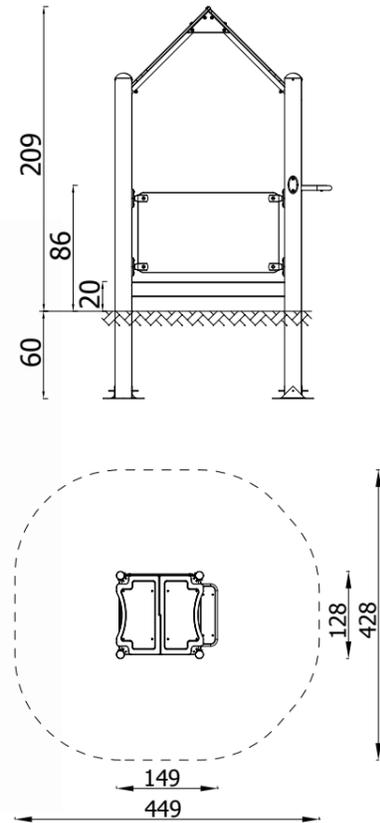

6 Scale comode per i bambini più piccoli

7 Pista di scivolamento in acciaio inossidabile.

Orbis

»» I prodotti della collezione Orbis sono disponibili in due versioni, legno e metallo. Qui puoi trovare set per bambini piccoli e grandi, piattaforme, torri e navi adorate dagli amanti delle avventure in mare. Numerosi giochi e manipolazioni, pareti da arrampicata, ingressi e ponti interessanti rendono il divertimento all'aria aperta più attraente.

Maggiori informazioni sulla serie Orbis su www.playeco.it

Orbis

1

Le strutture sono disponibili con pali in legno  o metallo 

2

Due versioni tra cui scegliere:
Extra Plus Zinc and Metal Plus

3

nella versione Extra Plus Zinc gli elementi portanti sono realizzati in legno lamellare, con scanalature verticali, con staffe di ancoraggio in acciaio zincato.

4

nella versione Metal Plus, i pali di sostegno sono realizzati in acciaio di alta qualità zincati e verniciati a polvere.

5

pedane anti scivolo

6

tetti e protezioni in HDPE estremamente resistente

7

i set, destinati soprattutto ai più piccoli, sono dotati di pannelli di attività e giochi

TRAMPOLINI

Superficie di sicurezza in **EPDM** colato e uniforme

Qualità e sicurezza garantite da **TÜV**

Possibilità di scelta del colore del bordo in gomma

Molle zincate a caldo

Un tappetino da salto realizzato con componenti in plastica resistente agli atti vandalici ed agli agenti atmosferici.

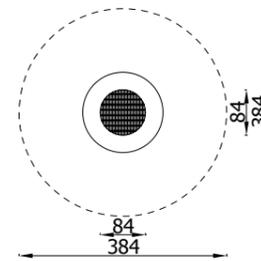

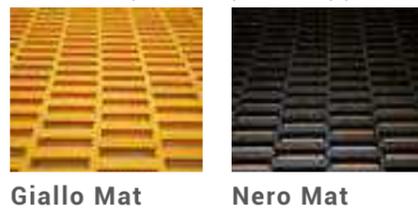

Vantaggi del salto sui trampolini:

- attivazione di tutti i muscoli
- rafforzare la forza fisica
- miglioramento della coordinazione occhio-mano e delle capacità motorie
- il rilascio di endorfine

Colori disponibili in EPDM:

Metal Plus - **3160SN**

ALTALENE

ALTALENE IN LEGNO SERIE **ORBIS**:

- » I montanti portanti sono realizzati in legno tondo lamellare incollato e scanalato verticalmente con un diametro di 120 mm.
- » Gli elementi in legno sono oliati o ricoperti con impregnante colorato.
- » La parte superiore dei montanti è coperta con tappi di plastica.
- » trave in acciaio di sezione 70 x 70 mm
- » Tutti i raccordi e i connettori sono resistenti agli agenti atmosferici e ai raggi UV.
- » L'altalena è montata su ancoraggi in acciaio.
- » Elementi in acciaio zincati.

ALTALENE IN LEGNO SERIE **QUADRO** :

- » I montanti portanti sono realizzati in legno lamellare incollato quadrato e scanalato con una sezione di 90 x 90 cm.
- » Gli elementi in legno sono oliati o ricoperti con impregnante colorato.
- » La parte superiore dei montanti è coperta con tappi di plastica.
- » trave in acciaio di sezione 70 x 70 mm
- » Tutti i raccordi e i connettori sono resistenti agli agenti atmosferici e ai raggi UV.
- » L'altalena è montata su ancoraggi in acciaio.
- » Elementi in acciaio zincati.

ALTALENE SERIE **TRIANGULO**:

- » Elemento strutturale della serie - pali quadrati a doppia scanalatura realizzati in legno fuori cuore impregnato sotto vuoto. Spessore palo: 90 x 90 mm
- » La parte superiore dei pali è protetta con tappi in plastica.
- » trave in acciaio di sezione 70 x 70 mm
- » Tutti i connettori e raccordi resistenti alle condizioni atmosferiche e ai raggi UV.
- » L'altalena è montata su ancoraggi in acciaio.
- » Elementi in acciaio zincati.

ALTALENE SERIE **ROBINIO**:

- » Costruzione del dispositivo in legno di robinia.
- » Lo spessore dei pali varia a causa del loro carattere naturale.
- » trave in acciaio inox con sezione 70 x 70 mm
- » Tutti i raccordi e i connettori sono resistenti agli agenti atmosferici e ai raggi UV.

ALTALENE SERIE **ORBIS METALLO** :

- » I montanti sono costituiti da un profilo tondo in acciaio con un diametro di 76 mm.
- » La parte superiore dei pali è coperta con tappi in plastica.
- » trave in acciaio di sezione 70 x 70 mm
- » Tutti i raccordi e i connettori sono resistenti agli agenti atmosferici e ai raggi UV.

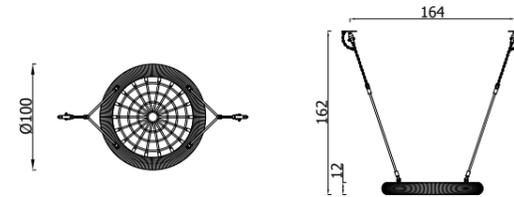

ALTALENE SERIE **QUADRO METALLO**:

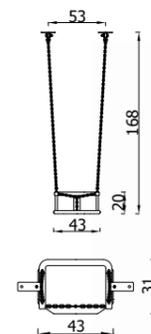

- » I montanti sono quadrati e hanno una sezione trasversale di 70 x 70 mm.
- » La parte superiore dei montanti è coperta con tappi di plastica.
- » trave in acciaio di sezione 70 x 70 mm
- » Tutti i raccordi e i connettori sono resistenti agli agenti atmosferici e ai raggi UV.

Mini Trials Arrampicata

» I Mini Trials di Arrampicata di PlayEco sono sistemi composti da vari ostacoli sotto forma di scale, salite e ponti mobili allungati. I dispositivi dei nostri parchi avventura sono stati progettati pensando ai bambini in età prescolare e scolare.

Maggiori informazioni
sulla serie Mini Trials
Arrampicata su
www.playeco.it

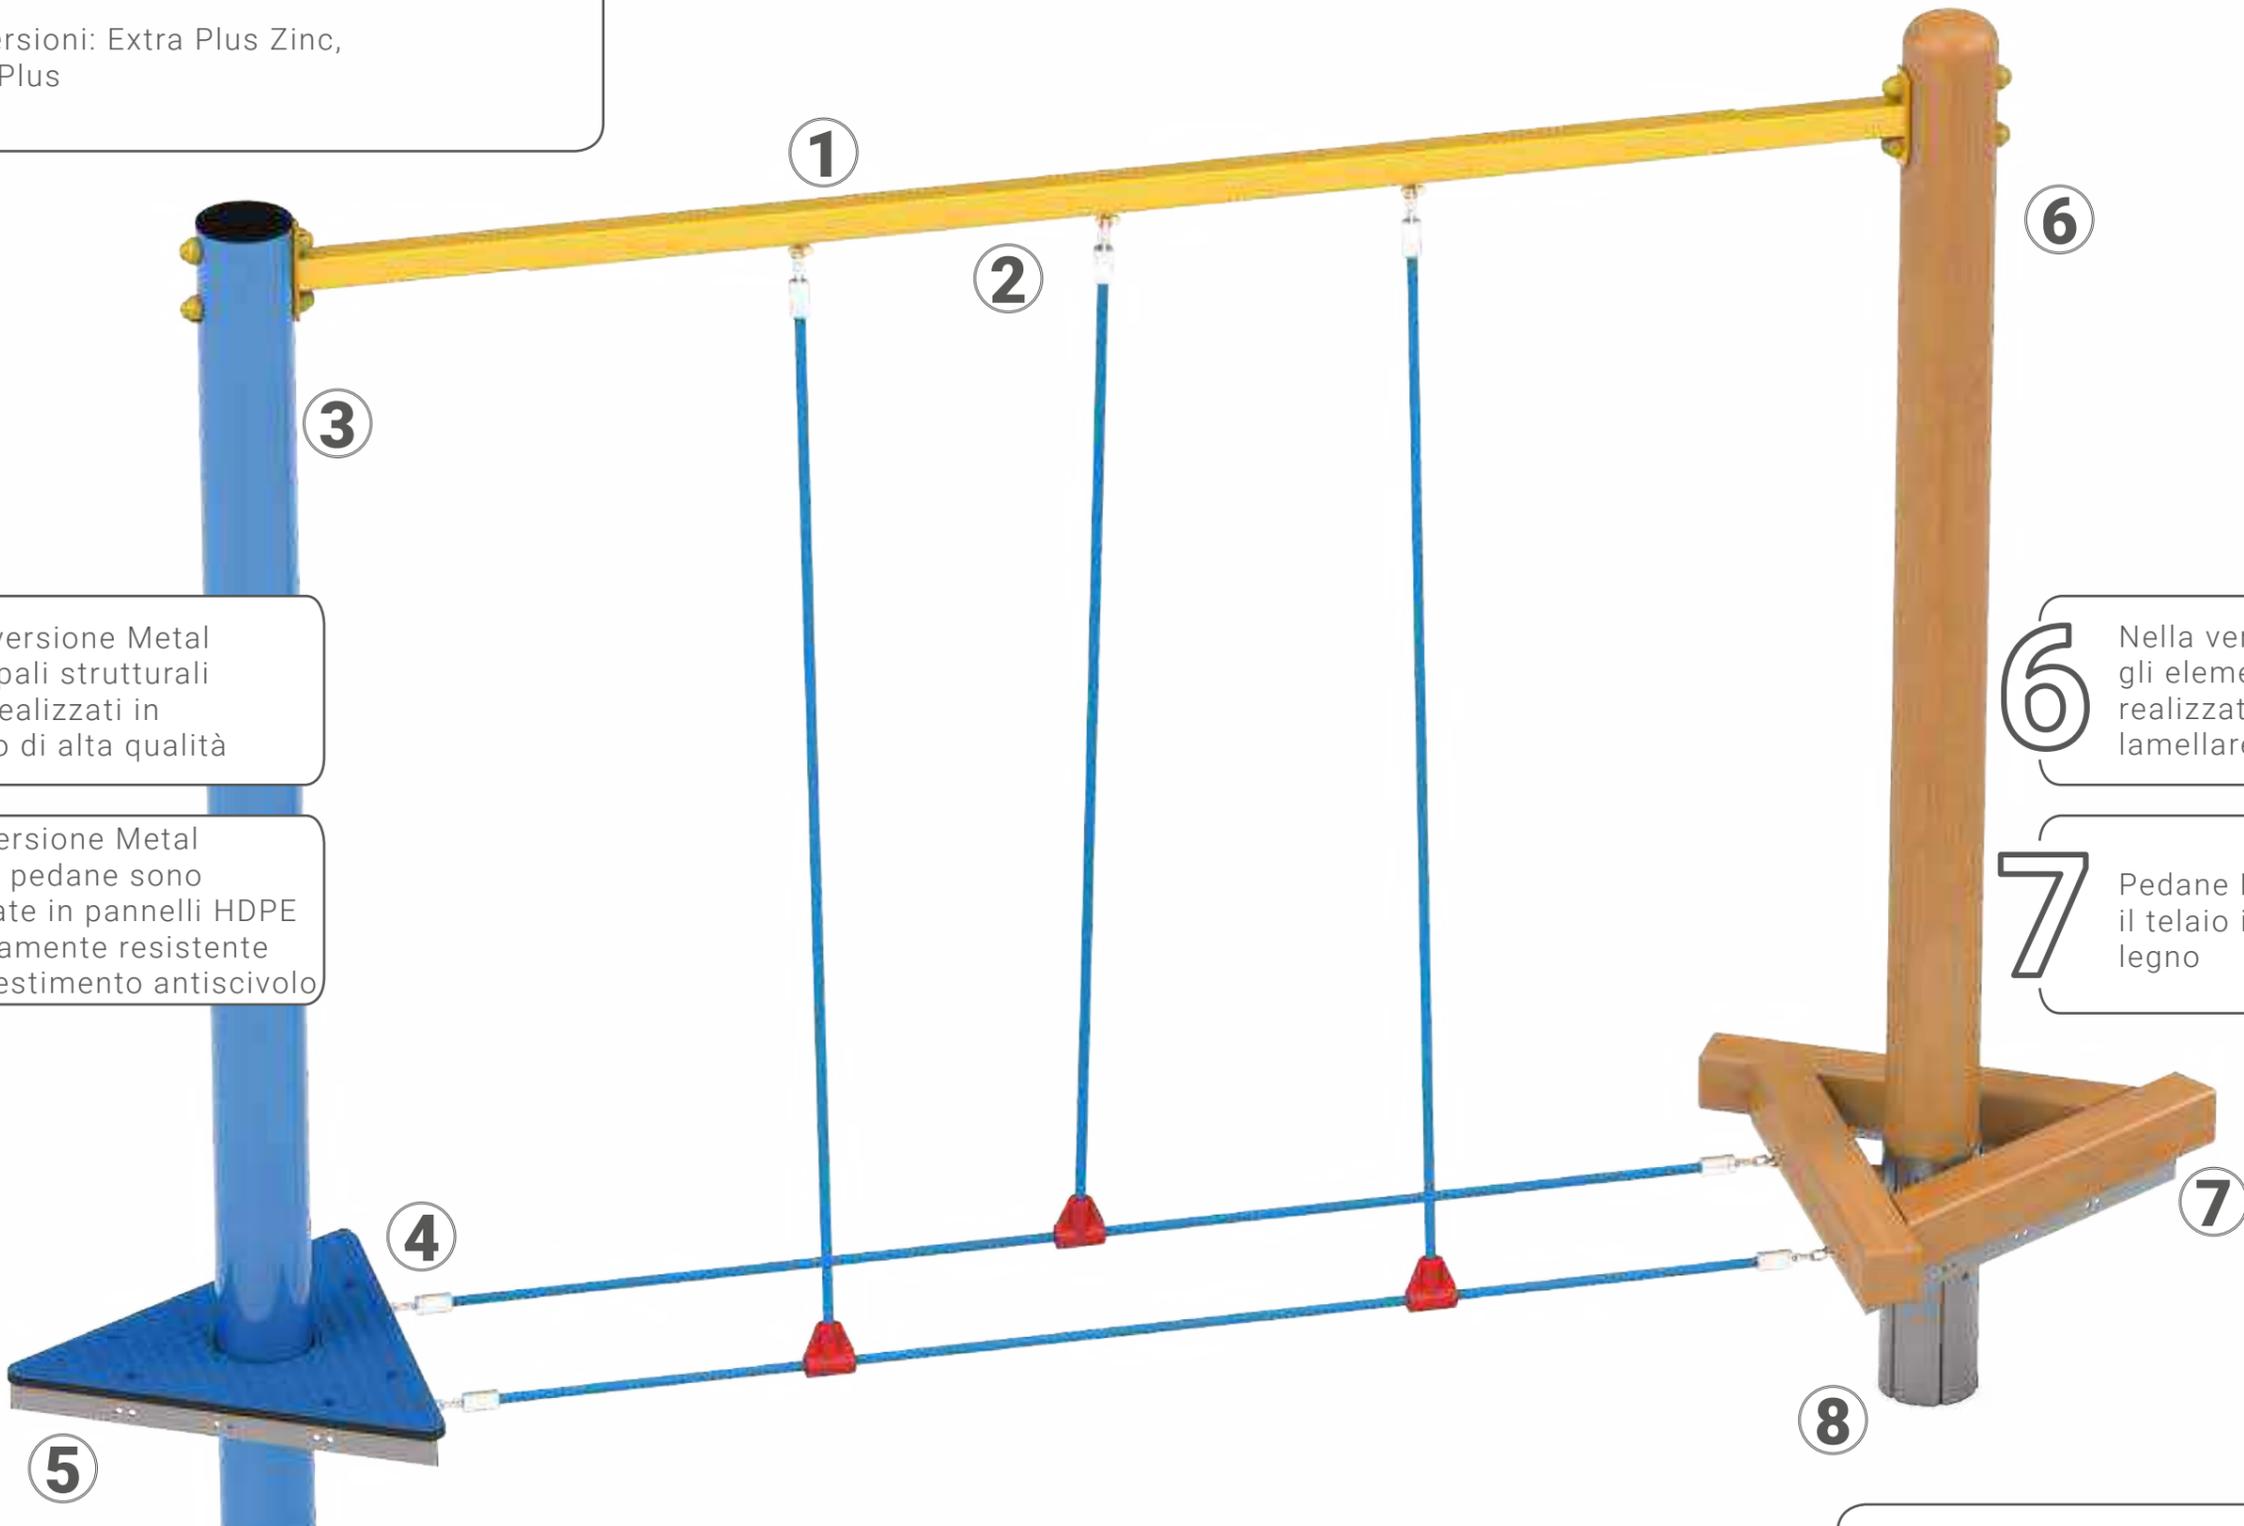

Mini Trials Arrampicata

1 Le attrezzature sono disponibili con pali di legno  o metallo 

2 Due versioni: Extra Plus Zinc, Metal Plus

3 Nella versione Metal Plus i pali strutturali sono realizzati in acciaio di alta qualità

4 Nella versione Metal Plus, le pedane sono realizzate in pannelli HDPE estremamente resistente con rivestimento antiscivolo

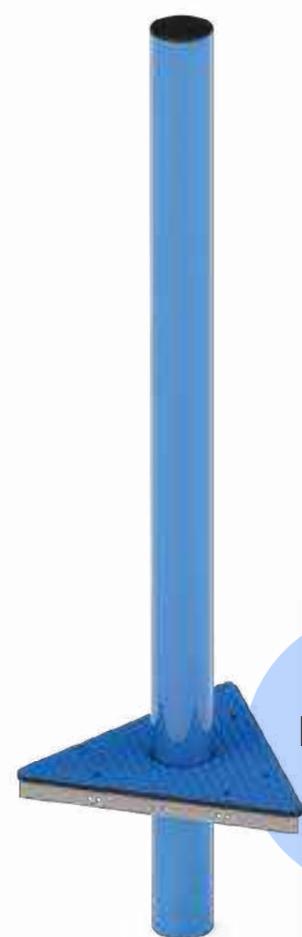

6 Nella versione Extra Plus Zinc gli elementi portanti sono realizzati con pali in legno lamellare

7 Pedane Extra Plus Zinc hanno il telaio in acciaio con travi in legno

5 Le attrezzature in metallo sono molto resistenti alle condizioni atmosferiche

8 Nella versione Extra Plus Zinc i pali sono installati nel terreno su ancoraggio in acciaio

I DISPOSITIVI SONO DISPONIBILI IN DUE VERSIONI:

METALLO

Stazioni in metallo:

Molto resistenti agli agenti atmosferici

Piattaforme:

Pannello in HDPE con rivestimento antiscivolo, infrangibile, resistente ai raggi UV

Assemblaggio:

direttamente nel terreno, ad una profondità di 80 cm

LEGNO

Stazioni in legno:

legno di pino incollato, con scanalature verticali

Piattaforme:

struttura in acciaio con travi in legno

Assemblaggio:

nel terreno su un ancoraggio in acciaio a una profondità di 70 cm

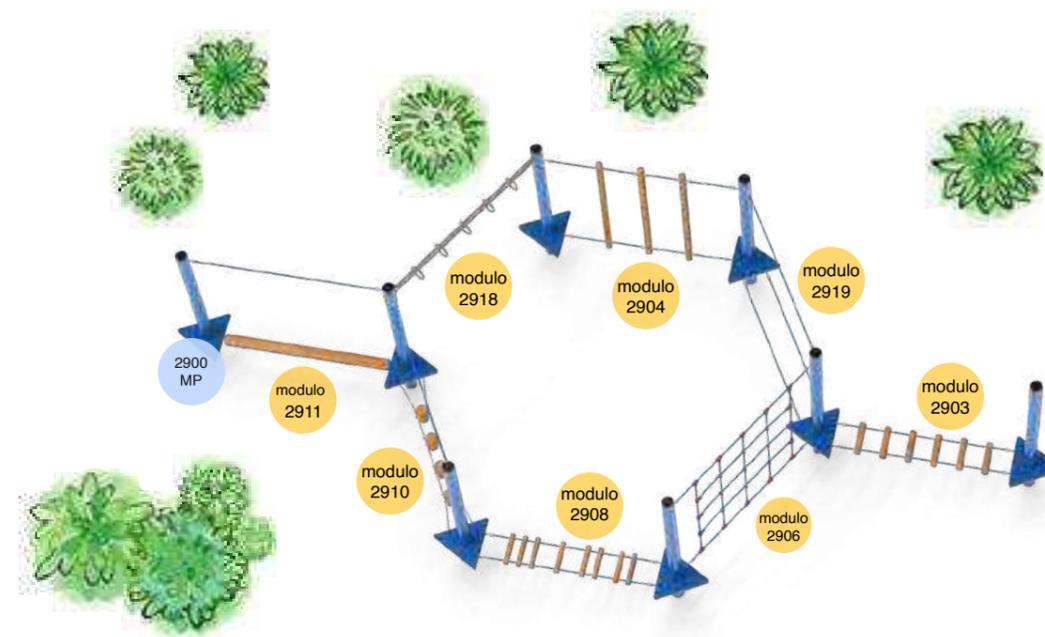

Come fare un ordine?

1
SELEZIONARE IL TIPO DI STAZIONE
metallo o legno

2
SELEZIONARE IL MODULO
da installare tra le stazioni

3
INVIARE LA LISTA DEI DISPOSITIVI...
e al resto ci pensiamo noi!

StreetWorkout

» StreetWorkout, ovvero allenamento a corpo libero, è un sistema di esercizi di forza in cui vengono utilizzati elementi di architettura urbana o dispositivi appositamente costruiti.

Tali allenamenti sono spettacolari, sviluppano tutte le parti del corpo, migliorano la coordinazione, le condizioni e la resistenza. Gli esercizi più popolari sono flessioni, crunch, trazioni, affondi con l'uso di barre, scale e pali.

Perché gli attrezzi di PlayEco?

I nostri attrezzi sono stati creati in collaborazione con un gruppo di professionisti che da anni studiano i benefici dell'allenamento a corpo libero. Ci hanno consigliato come costruire gli attrezzi per ottimizzare gli esercizi e migliorare la mobilità. L'offerta diversificata ti consentirà di configurare un set su misura per le esigenze degli utenti.

Caratteristiche dei nostri dispositivi

Elementi strutturali in tubi di acciaio
42,4 x 2,9 mm.

Elementi strutturali
da tubo in acciaio
diametro. 33,7 mm,
spessore 2,9 mm

Anelli da ginnastica
in tubo d'acciaio
montati su corde in
polipropilene con
anima in acciaio,
resistenti agli atti
vandalici.

Pali portanti in
profilo 90 x 90 mm.

Pali portanti incassati
direttamente nel
terreno fino ad una
profondità di 80 cm

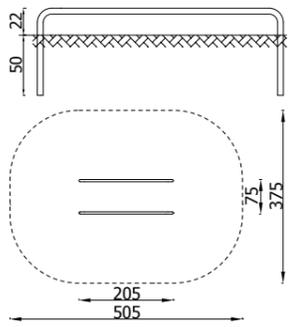

Elementi in acciaio e
verniciati a polvere.

Corrimano in tubi di acciaio da 48,3
mm

Fitness

» Sempre più persone parlano della necessità di esercizio e tempo libero attivo.

Questa tendenza include attrezzature per palestre all'aperto, che sono destinati a tutti gli utenti adulti e consentono l'esercizio di tutti i muscoli e le parti del corpo.

La collezione di attrezzature in acciaio per palestre all'aperto aumenta l'attrattiva di parchi, piazze, complessi residenziali, parchi giochi, spiagge, impianti sportivi e sanatori.

Attrezzi Fitness con pannello istruzioni

Il doppio pilone portante è un elemento robusto, per il supporto degli attrezzi, consente l'installazione sui due lati di pannelli di istruzione

Montato a **30 cm** sotto terra su un blocco prefabbricato in cemento.

Realizzato con tubi di diametro **114 mm** su basi in acciaio in lamiera da **8 mm**.

Realizzato in acciaio **S235**, zincato, verniciato a polvere.

Funge da pannello informativo con descrizione e manuale di istruzioni dei dispositivi installati.

Cod. 4401

Tecnologia

dispositivi realizzati in acciaio S235, verniciato con vernice a polvere resistente agli agenti atmosferici

isolatori di vibrazioni di alta qualità - elementi che assorbono le vibrazioni generate colpendo le parti l'una dell'altra

ci sono due tipi di cuscinetti nei dispositivi: a sfera e conici

elementi principali in acciaio realizzati con profili chiusi con uno spessore di 3,2 mm

sedili e schienali in HDPE o acciaio inossidabile, resistenti agli agenti atmosferici

dispositivi esenti da guasti e manutenzione, progettati per un uso a lungo termine

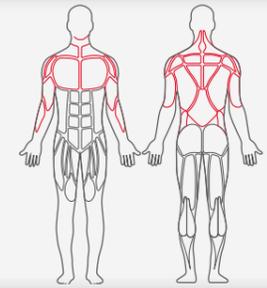

Vantaggi nell'utilizzo di dispositivi Fitness PlayEco

A seconda del tipo di dispositivo, nonché della correttezza e dell'intensità degli esercizi eseguiti, vengono attivati i singoli muscoli e parti del corpo.

Esercizio - Parte superiore del corpo

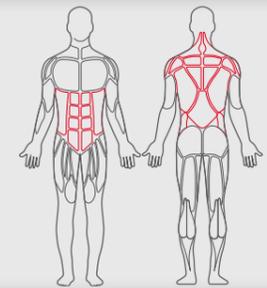

Allenamento incentrato sul lavoro dei muscoli delle mani, delle braccia, del torace e della schiena. A queste parti sono dedicati esercizi come pull-up, pull e bench press.

1

Esercizi core

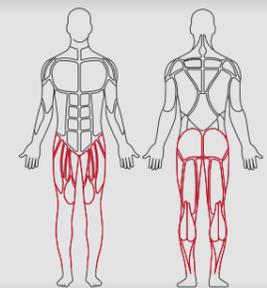

Esercizi per migliorare la postura e la stabilità del corpo. Coinvolgono maggiormente i muscoli addominali e della schiena. A queste parti sono dedicati esercizi come piegamenti, torsioni, allungamento e trazioni.

2

Esercizi-Parte inferiore del corpo

Allenamento basato sul miglioramento della condizione e della forza delle nostre gambe dei glutei.

3

Caratteristiche della collezione Fitness Park:

Rafforza i muscoli delle braccia e le parti della parte superiore del corpo

Rinforza i muscoli addominali

Migliora l'equilibrio

Migliora la coordinazione motoria

Rafforza i muscoli della schiena/aiuta a mantenere una corretta postura del corpo

Migliora le condizioni generali e postura

Rinforza i muscoli delle gambe e delle parti inferiori del corpo

Massaggia i muscoli posteriori

Massaggia i muscoli dell'anca

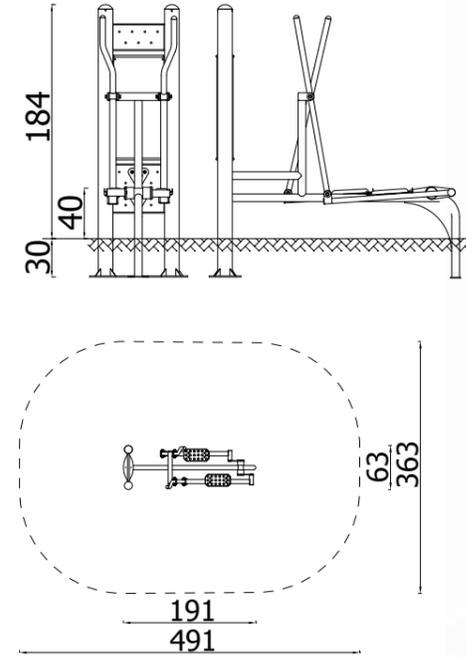

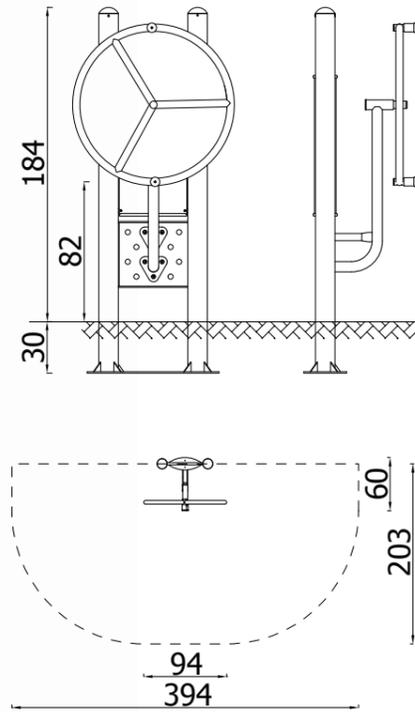

Rafforza e modella i muscoli glutei

Vantaggi:

- ✓ poggipiedi e viti in acciaio inossidabile
- ✓ tubolari chiusi con tappi in plastica.
- ✓ i principali componenti in acciaio sono realizzati con tubi e profili con uno spessore della parete di 3,2 mm
- ✓ isolatori di vibrazioni di alta qualità - elementi che assorbono la forza delle vibrazioni
- ✓ dotato di due tipi di cuscinetti esenti da manutenzione: a sfere e conici
- ✓ sedili e schienali in HDPE antiscivolo e resistente
- ✓ connettori in acciaio inossidabile, bulloneria autobloccante
- ✓ tutti gli elementi in acciaio sono realizzati in acciaio S235 e verniciatura a polvere, resistente alle condizioni atmosferiche

Potrebbero esserci differenze nei colori e nell'aspetto dei prodotti presentati nelle foto del progetto

GIOCHI A QUATTRO ZAMPE

PARCO GIOCHI PER AMICI A QUATTRO ZAMPE

I nostri dispositivi sono una soluzione ideale per i proprietari di cani che preferiscono trascorrere il tempo in modo attivo.

I parchi per cani consentono di creare una zona di sicurezza per gli animali e i loro proprietari. Aree separate e chiuse aiutano a mantenere pulite le aree ricreative.

Il parco giochi per cani è un vantaggio di una città moderna e innovativa. La nostra attrezzatura è progettata con ergonomia e alta utilità per tutti i residenti.

È un luogo ideale per il divertimento del cane. Le persone possono incontrarsi con altri amanti dei cani, trascorrere del tempo insieme, passeggiare o semplicemente divertirsi con i loro amici.

Grazie ai materiali di alta qualità utilizzati nella produzione, i nostri dispositivi rappresentano un buon investimento per molti anni.

GIOCHI PER CANI DI PICCOLA TAGLIA

Piccola Piattaforma

Cod. **P010-H** disponibile nella versione HDPE

Questo esercizio favorisce coraggio, agilità e precisione nel superare gli ostacoli. Il cane dovrebbe arrivarci molto lentamente con la guida.

Dimensioni: 188 x 58 x 40 cm

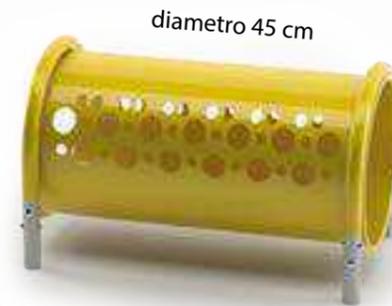

Tunnel per cani

Cod. **P013** disponibile in metallo

Il cane dovrebbe saltare nel tubo e attraversarlo. Questo esercizio può essere eseguito da due persone, che aiuteranno il cane a rimanere concentrato nello spazio chiuso.

Dimensioni: 59 x 96 x 56 cm

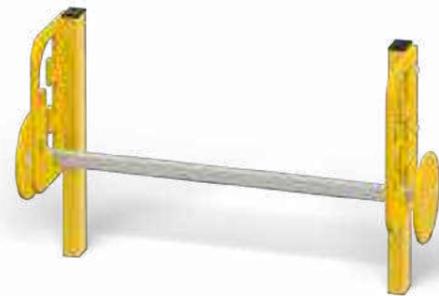

Barrara per salto piccolo

Cod. **P014** disponibile in metallo

Questo esercizio è una sfida per il cane che incoraggia il salto. Il dispositivo consente facili cambi di altezza della Barrara, più alti per esperti e inferiori per principianti e cani di piccola taglia.

Dimensioni: 24 x 93 x 51 cm

Il salto del cerchio piccolo

Disponibile in metallo

Cod. **P012**

Il salto del cerchio è dedicato ai cani di piccola taglia. Esso sviluppa il salto. La guida sceglie l'anello e il cane deve attraversarlo. Il cane dovrebbe iniziare ad allenarsi dall'anello più basso.

Dimensioni: 92 x 126 x 5 cm

Piattaforma tripla

Disponibile nella versione HDPE

Cod. **P011-H**

La piattaforma tripla richiede al cane di fare un passo o saltare da ciascuna piattaforma a diverse altezze. Dopo l'esercizio il cane deve saltare a terra solo quando la guida gli darà un chiaro comando.

Dimensioni: diametro piattaforma 38 cm, altezza 23 - 43 cm

Piccolo Bilico

Disponibile nella versione HDPE

Cod. **P015-H**

Dispositivo per cani esperti. Un cane entra nella trave di equilibrio e bilanciando il corpo cammina da un lato all'altro. Il cane dovrebbe camminare lungo il dispositivo dall'inizio alla fine. Non è consentito saltare su questo dispositivo. Il cane sviluppa equilibrio e sicurezza, nonché un comportamento appropriato e fiducia verso la guida.

Dimensioni: 40 x 119 x 31 cm

CANI DI TAGLIA MEDIO-GRANDE

Piattaforma zampa

Cod. **P001-H** disponibile nella versione HDPE

Questo gioco sviluppa il coraggio e aiuta il cane a controllare la sua emozione durante l'esercizio. Il cane salta sulla piattaforma e si ferma su di essa, quindi deve sedersi e rimanere in questa posizione finché la guida non lo lascia andare.

Dimensioni: 90 x 90 x 30 cm

Slalom

Cod. **P002** disponibile in metallo

Il cane passa tra i pali passandoli una volta sul lato destro, una volta sul lato sinistro. Migliora concentrazione e agilità. Il set include 6 articoli.

Dimensioni: 300 x 5 x 92 cm

Barra per salto grande

Cod. **P009** disponibile in metallo

Questo esercizio è una sfida per il cane che incoraggia il salto. Il dispositivo consente una rapida e facile cambio dell'altezza della Barrara, più alto per gli esperti e inferiori per principianti e cani di piccola taglia.

Dimensioni: 183 x 20 x 87 cm

Tunnel Grande

Cod. **P008** Disponibile in metallo

Il cane dovrebbe saltare nel tubo e attraversarlo. Questo esercizio può essere eseguito da due persone che aiuteranno il cane a rimanere concentrato nello spazio chiuso. Una persona aiuta il cane ad entrare nel tubo e la seconda aiuta ad uscire. Questo esercizio rafforza il coraggio.

Dimensioni: 152 x 90 x 101 cm

Il salto del cerchio grande

Disponibile in metallo

Cod. **P006**

Il salto del cerchio è dedicato ai cani più grandi. Esso sviluppa il salto. La guida sceglie l'anello e il cane dovrebbe saltarci dentro. Il cane dovrebbe iniziare esercitandosi dall'anello più basso.

diametro cerchio
61 cm

Dimensioni: 192 x 5 x 147 cm

Passerella - camminata del cane

Disponibile nella versione HDPE

Cod. **P007-H**

Questo dispositivo è dedicato ai principianti. I cani possono camminare o correre su, attraverso e giù per le assi in base al loro equilibrio individuale. Questo esercizio richiede il contatto con la guida. Aiuta il cane nel coraggio e costruisce un buon rapporto tra guida e cane.

Dimensioni: 75 x 590 x 48 cm

Bilico Grande

Disponibile nella versione HDPE

Cod. **P003-H**

Dispositivo per cani esperti. Il cane dovrebbe camminare lungo il dispositivo dall'inizio alla fine. Aiuta il cane a sviluppare equilibrio e sicurezza e aiuta anche il cane ad apprendere un comportamento appropriato e a fidarsi della guida.

Dimensioni: 50 x 235 x 70 cm

Step

Disponibile nella versione HDPE

Cod. **P004-H**

L'esercizio sulle diverse altezze, il passo delle zampe richiede la concentrazione speciale del cane. Aiuta il cane a sviluppare equilibrio e sicurezza. La guida dovrebbe supportare il cane durante l'esercizio.

Dimensioni: diametro piattaforma 38 cm, altezza 23 - 43 cm

Collina Grande

Disponibile nella versione HDPE

Cod. **P005-H**

L'esercizio sviluppa coraggio, agilità e precisione nel superare gli ostacoli. Il cane dovrebbe raggiungerlo molto lentamente con l'assistenza della guida.

Dimensioni: 237x75x61 cm

PAVIMENTAZIONE IN GOMMA COLATA

La aree gioco all'aria aperta permettono ai bambini di crescere giocando, liberi di muoversi con fantasia nello spazio.

Risulta quindi indispensabile garantire loro protezione e sicurezza .

La pavimentazione con sistema di assorbimento d'impatto garantisce una soluzione sicura e colorata per aree gioco pubbliche e giardini acquistando una valenza estetica, di arredo e gioco.

La fantasia è lasciata libera di creare nuove forme e figure tramite l'alternanza di colori e disegni, ottimi per le realizzazioni di nuovi progetti o rinnovamento di aree gioco esistenti.

ECOSOFT PAVIMENTAZIONE IN GOMMA COLATA IN OPERA

Il sistema di pavimentazione colata in opera è un materiale continuo e poroso costituito da granuli di gomma e collanti. Mescolato ed posato sul posto, lo strato di sottofondo è composto da gomma nera riciclata da vecchi pneumatici, lo strato superiore di rifinitura costituito da gomma EPDM è disponibile in svariate tonalità per rendere vivace e colorata l'area gioco.

Il materiale è altamente insonorizzante, lo rendono adatto alla realizzazione di parchi gioco nelle zone urbane o vicino a centri abitativi. Adatto a terreni piani, curvi e con pendenze fino a 45°. Le possibilità di creare forme e disegni per ogni gusto sono infinite, donando brillantezza e vivacità ad ogni area.

Le pavimentazioni in gomma sono indispensabili laddove si voglia realizzare un parco realmente inclusivo, perchè sono il presupposto principale per garantire l'accesso alle attrezzature e renderle facilmente accessibili.
